

FEIAP NET ZERO DECLARATION

The undersigned, representing the member economies of the Federation of Engineering Institutions of Asia and the Pacific (FEIAP), the Chinese Institute of Engineers (CIE) – host of FEIAP 2024, the World Federation of Engineering Organizations (WFEO) and CTCI Group (CTCI) - a globalized EPC enterprise based in Taiwan who determined to act as a “Guardian of Sustainable Earth”, have gathered here in Taipei to participate the FEIAP 2024 activities (FEIAP 32nd GA Meeting and the 7th Convention) with the Main Theme: Engineering Resilience and Education for a Net-Zero Future to support the global net zero effort, on May 1st-3rd 2024.

Engineering sectors play an important role in the global carbon mitigation work. As an important regional engineering organization in the Asia and the Pacific areas, FEIAP and its member economies have the obligation to declare their strongest support to engineering a net zero future.

CIE, therefore, taking the opportunity of hosting FEIAP 2024, arranges this important event to sign the FEIAP NET ZERO DECLARATION on May 1st 2024 under the witness of WFEO/CTCI and a FEIAP NET ZERO TREE planting ceremony, to declare and commemorate FEIAP’s support to net zero ambition.

The undersigned hereby sign this FEIAP NET ZERO DECLARATION to express their determination to:

- Recognize the important role engineers play in the coordinated global efforts aimed at achieving the goals set in the Paris Agreement;
- Declare its strongest support to limiting carbon emissions through the work performed by engineers;
- Make best effort to address climate change through improved engineering practices and education.

Signed by:

Witnessed by:

Aung Kyaw Myat, President of FEIAP

Tan Seng-Chuan, President-Elect of WFEO

YANG Cheng-Hong, President of CIE

John T. YU, Group Chairman of CTCI

Background of the FEIAP NET ZERO TREE IN TAIPEI

The Paris Agreement, adopted at the UN Climate Change Conference on December 12 2015, reaffirms the goal of holding “the increase in the global average temperature to well below 2°C above pre-industrial levels” and pursuing efforts “to limit the temperature increase to 1.5°C above pre-industrial levels.” Achieving these goals requires concrete policies, measures, and actions from all sectors. Among these, the engineering sectors play a very important role in the global carbon mitigation work.

As the host of FEIAP 2024, CIE proposed the main theme of the convention as Engineering Resilience and Education for a Net-Zero Future and announced it in Nay Pyi Taw, Myanmar in September 2023 at the FEIAP 31st General Assembly. To underscore the determination of the FEIAP member economies to work together towards reducing global carbon emissions through engineering, CIE organizes a Planting Ceremony of the first two FEIAP NET ZERO TREES (FEIAP NET ZERO TREE IN TAIPEI) together with the Signing Ceremony of FEIAP NET ZERO DECLARATION through the help of FEIAP secretariat and FEIAP Standing Committee on Environmental Sustainability, as part of FEIAP 2024’s important activities, during which two trees (the “FEIAP NET ZERO TREES”) are planted on the grounds of the host enterprise CTCI in Taipei.

The first two FEIAP NET ZERO TREES shall be planted in Taipei on this May 1st 2024 jointly by:

- Aung Kyaw Myat, President of FEIAP
- Tan Seng-Chuan, President-Elect of WFEO
- YANG Cheng-Hong, President of CIE - host of FEIAP 2024
- John T. YU, Group Chairman of CTCI

With witnesses from representatives of FEIAP member economies who participating this planting ceremony.

FEIAP wishes to express its sincere thanks to CTCI for providing the grounds of its 2nd HQ in Taipei as the location for the first two FEIAP NET ZERO TREES’ planting and supplying them with the necessary care in the future. Similar efforts are expected for future hosts of major FEIAP activities, so as to highlight the importance of the organization’s carbon emission reduction ambitions.
