Support for Declaration of World Engineering Day for Climate Change Action and Sustainability

Dear Ms. Azoulay,

On behalf of the members of the Peruvian Association of Professional Engineers, I am writing to indicate the strong support of our organisation for the Declaration of 4th March of each year as World Engineering Day for Climate Change Action and Sustainability.

The Peruvian Association of Professional Engineers is the national body for Peru that ensures the development of national engineering, authorize the practice of engineering, certificate and train engineers.

We directly or indirectly represent 217,300 engineers.

If declared, our organisation commits to celebrating World Engineering Day with a wide range of activities that promote the role of engineering for climate change action and sustainability as urgent action is needed in these areas. Such celebrations will improve community recognition of the importance of engineering to society and the economy.

The activities to celebrate World Engineering Day is expected to encourage young people, girls and boys, to raise the number of people studying science and mathematics, increasing the intake of engineers into universities. This is critical for the sustainable development of our country.

We anticipate that our activities will reach and have an impact on 31 million people in our country/region.

Yours sincerely,

Jorge Alva Hurtado

Chairman

Peruvian Engineers Association
