## **Subject: Support for the WFEO proposal for World Engineering Day for Climate Change Action and Sustainability**

To whom it may concern,

The Chinese National Commission for UNESCO is pleased to confirm its support for the proposal regarding the Proclamation of 4th March of each year as World Engineering Day for Climate Change Action and Sustainability raised by the World Federation of Engineering Organizations.

Engineering and Engineers are crucial to address the risks of climate change and to ensure sustainable development. A World Engineering Day for Climate Change Action and Sustainability will be an opportunity to demonstrate the importance of engineering to modern life and the central role of engineering in developing the technologies needed for climate change action as well as for sustainable development, and to promote the dialogue between citizens, engineers and policy-makers for climate change action.

Considering it is in line with the *2030 Agenda for Sustainable Development* and *UNESCO Strategy for Action on Climate Change (2018-2021)*, the Chinese National Commission for UNESCO fully support the WFEO proposal.
