Paris, France
Ms. Audrey Azoulay

27.06.18 № 1-18/85

Dear Ms. Azoulay!

On behalf of the members of the Union of Scientific and Engineering Associations, I am writing to indicate the strong support of our organisation for the Declaration of 4th March of each year as World Engineering Day for Climate Change Action and Sustainability.

The Union of Scientific and Engineering Associations is the international member of WFEO for Russian Federation, Azerbaijan, Belarus, Uzbekistan and other countries that are members of the Union with responsibilities for engineering community of the Eurasian region.

We directly or indirectly represent 210 000 engineers.

If declared, our organisation commits to celebrating World Engineering Day with a wide range of activities that promote the role of engineering for climate change action and sustainability as urgent action is needed in these areas. Such celebrations will improve community recognition of the importance of engineering to society and the economy.

The activities to celebrate World Engineering Day is expected to encourage young people, girls and boys, to raise the number of people studying science and mathematics, increasing the intake of engineers into universities. This is critical for the sustainable development of our country.

We anticipate that our activities will reach and have an impact on millions people in our countries.

Yours sincerely,

First Vice-President of USEA

S.Drukarenko
